Amendments to the Claims

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

- 1-21. (cancelled)
- 22. (currently amended) A control method for selecting valve actuating modes in a multivalve engine having at least an electromechanically actuated valve, the method comprising: determining an operating condition of said electromechanically actuated valve; and deactivating cylinder modes wherein <u>said</u> electromechanically actuated valve operates, <u>said deactivation occurring</u> when said operating condition indicates a condition of degraded performance of said electromechanical valve.
- 23. (original) The method of Claim 22 wherein said operating condition is a temperature of said electromechanical valve actuator.
- 24. (original) The method of Claim 22 wherein said operating condition is an amount of electrical current flowing through said electromechanical valve.
- 25. (original) The method of Claim 22 wherein said operating condition is a voltage drop across said electromechanical valve.

- 26. (original) The method of Claim 22 wherein said operating condition is a position of said electromechanical valve.
- 27. (original) The method of Claim 22 wherein said operating condition is an impedance of said electromechanical valve.

28-34. (cancelled)
